

Covid-19 Impact Of Services Sectors & Other Sectors**Bhutada V.R***A.C.S. College, Gangakhed***Abstract :**

The impact of covid 19 pandemic in India. has been largely disruptive in terms of economic activity as well as a loss of human lives. All most all the sectors have been adversely affected as domestic demand & exports sharply plummeted with some notable exceptions where high growth was observed. The covid-19 pandemic is continuing to exert pressures on the agri - food industry both from the business & workers sides with some sectors shouldering a particularly high burden. This brief highlights the impact of covid-19 on the media & culture sector, hit hard by unemployment & closed productions. The covid-19 pandemic is affecting public health & causing unprecedented disruptions to economies & labour markets including for workers & enterprises in the forest sector. In government response, workers & employers organisation & other forestry stakeholders around the world. are collaborating to mitigate the impact of the pandemic with a view to protecting businesses & livelihoods including through social dialogue & the promotion of international labour standards. The road transport sector is essential to social & economic development but in order to curb the spread of covid 19. Many countries around the world have placed restrictions on domestic transit. and closed border crossings for road freight transport services. Tourism is a major drivers of jobs & growth. But Covid-19 has dramatically changed this. The impact on tourism enterprises & workers, the majority being young women, is unprecedented.

Introduction :

The covid-19 pandemic which resulted in lockdown across the world and business were forced to run their activities by keeping the social distancing in mind to reach out to the customers. The sudden change in the business approach due to the pandemic has resulted many of the players in services sector to stop their business activities. sectors like education, tourism, health care etc. The governments restrictions on the E-commerce platform was all actions to provide only essential goods to the borrowers & the service providers came in with the improvement in their services to provide contact less deliveries to the customers at their doorsteps, these type of activities has resulted enormous in crease in the E-payments crossing multibillions in the month after the initial lock downs.

Covid-19 Impact Of Services Sectors & Other Sectors

Covid-19 is having an unpredictable and unprecedented impact on the worlds economy. The pandemic has driven the world toward adapting to the current circumstances regardless of the business or services sector. The covid-19 has affected the global economy & service sector. The purpose of the current study in assess the effect of covid-19 on service sector growth & sustainability. This study aims to investigate the economic effect of covid-19 on service sector firms.
